

Errata – LCB File No. R104-14P

The following errata identifies technical corrections that need to be made to LCB File No. R104-14P:

1. Add the following language to section 27, subsection 1:

- (e) The operator of a detoxification program shall assure that detoxification technicians monitor clients whenever clients are present in the program unless the provider utilizes more qualified staff such as a Nevada registered nurse, licensed practical nurse, licensed nurse practitioner, licensed physician assistant, or licensed physician.

Rationale: Adding this language ensures that detoxification technicians or more qualified staff monitor clients in a detoxification program.

2. Do not strike section 29, subsections 2 through 6.

Rationale: This language ensures that the program operator and staff act in the best interest of a client, terminate services when they are of no benefit to the client, not accept payment for referrals from the entity to which the client was referred, not personally exploit a client, and not engage in sexual relations with a client.

3. Strike section 29, subsection 7.

Rationale: The certification inspection instrument stipulates that only funded programs will be inspected for compliance with section 29, subsection 7; therefore, this subsection applies only to the operator and staff of funded programs. The verbiage of section 29, subsection 7 will be made a subgrant assurance and not be included in the Proposed Regulation.
